

BABY CHEEMS INU

WHITEPAPER

MISSION

The number of coins in the blockchain industry has grown dramatically recently, but so has the number of failed and rugged projects.

We aim to launch a community driven token on the Binance Smart Chain (BSC) Network, with a proper usecase and link to the meme world, also being fully secured and 100% safe.

We are wanting to fast track the real use case functionality of baby cheems inu so that the project does not sit stagnant or 'die'. This will give investors a good return, fast on investment, which is what they look for, as well as bring in more investors, thus increasing the value of the token.

We will do this by launching our nfts just like our mother project and in the near future by partnering with online gaming/gambling platforms and apps to have Baby Cheems Inu as a form of payment and we are already planning the negotiating stages with potential partners.

WHY WE CREATED BABY CHEEMS INU

We see a huge potential in the crypto market for successful projects and for people to make money, but what is mostly seen is people losing money through scam projects or projects that never get off the ground. We know why everyone is here, and it's to make money. So, we decided to plan a potential baby meme token which had its predecessor perform remarkably. We wanted to come into this open and honest and say "lets show everyone the power of our meme community in crypto". We decided to look for real use case options and also meme origins and created a token ourselves. And the reaction we have received has been very positive. The concept of Baby Cheems Inu is elegant and much needed. A meme coin with a perfect utility for NFT marketplaces and much more.

WHY TO CHOOSE BABY CHEEMS INU?

GROWTH

As mentioned we are already in negotiations with influencers, use case designers and NFT marketplace developers. Website was up before hand as this is something we wanted to have in place when we launched so as not to have a lengthy process to go through for investors to see results.

SUPER MARKETING

Every transaction tax includes a 6% marketing tax, which is a heavy tax and solely because we value our holders and will provide the best planned and executed marketing.

SAFE AND SECURE

We are taking all the safety procedures we can to protect your investment. Liquidity is 100% locked and contract ownership renounced.

TOKENOMICS

- Token Total Supply :1,000,000,000,000,000 (1 quadrillion)
- Total tax: 14%
- Marketing:6%
- Dev:2%
- LP:4%
- Reflections:2%

ROADMAP

Phase 1:

- stealth launch
- marketing
- 1k TG members
- 500holders
- cmc applied
- cg applied
- nomics applied
- lbank applied
- marketing push

Phase 2:

- cmc listing
- cg listed
- nomics listed

- lbank listed

- twitter raids

Phase 3:

- nfts released

- staking platform

- 5k holders

- marketing push

Phase 4:

Under Development
